

# MILITARY AI WORKS

In cooperation with

## *MAIW Dyess AFB B-1B Package*

Version: 2.0

For FS 2004 / FS9

Initial Release Date: February 2007

Project Manager: Desmond "Reconmercs" Burrell, [reconmercs@aol.com](mailto:reconmercs@aol.com)

In the first part in a two part series, MAIW brings you the Dyess AFB package of the B-1B Lancer package. This easy to install package features the beautifully constructed B-1B Lancer by Nick Black and Rysiek Winawer. Also featured are repaints by Mike Pearson recreating most of the aircraft stationed at Dyess AFB, Texas of the 7<sup>th</sup> Bomb Wing along with callsigns and flightplans, and as a bonus also included are Henry Tomkiewicz's C-130H's with callsigns, paints and flightplans depicting the 317<sup>th</sup> Airlift Group which is also stationed at Dyess AFB.

### **1. About MAIW**

Military AI Works (MAIW) is a loosely affiliated, international group of flightsim enthusiasts who share the common goal of seeing realistic military AI traffic in MS Flightsim. Our goals:

- 1) Produce only high-quality, freeware packages and products
- 2) Create military AI traffic accurately within the bounds of MS Flightsim
- 3) Promote new freeware military AI models, scenery and products
- 4) Advance military AI modeling of countries around the globe
- 5) Respect the rights of designers and contributors

To learn more about MAIW or to become a contributor, visit our website at <http://militaryaiworks.com>.

### **2. Credits**

B-1B Lancer:

- Nick "nickblack423" Black and Rysiek "RipPipPip" Winawer

FDE and Effects work for the B-1B

- Mike MacIntyre  
- Nick Needham  
- Jan Rosenberg

C-130H:

- Henry Tomkiewicz

Repaints:

- B-1B: Mike "mikeblaze" Pearson  
- C-130H: Graham King

Voicepacks:

- Stewart Pearson and Dan "Deltab" Bourque

Flightplans:

- Desmond "Reconmercs" Burrell

Afcads:

- Dyess AFB: Desmond "Reconmercs" Burrell

Beta Testing:

- MAIW Beta Team

Easy-to-install packaging by [World of AI](#)

### **3. Units Included in this Package**

Patches from <http://usafpatches.com> – used with permission

#### **7<sup>th</sup> Bomb Wing**

-

#### **28<sup>th</sup> Bomb Squadron**

Aircraft: B-1B

Callsign: "Hawk"

**9<sup>th</sup> Bomb Squadron**  
Aircraft: B-1B  
Callsign: "Bat"

**39<sup>th</sup> Airlift Squadron**  
Aircraft: C-130H  
Callsign: "Hazard"

**40<sup>th</sup> Airlift Squadron**  
Aircraft: C-130H  
Callsign: "Hazard"

## 4. Installation

### **Step 1) Install this package**

**2a)** Read the installer page regarding installation of this file: <http://www.world-of-ai.com/installer.html>

**2b)** Install the package in accordance with the World of AI Installer instructions

NOTE: If an uninstall is desired at a later date, only the aircraft and flightplans will be removed. All scenery files, including

AFCADs, will need to be removed manually.

### **Step 2) Remove duplicate AFCAD files**

Open your "Flight Simulator 9/Addon Scenery/scenery" folder and remove any previously installed AFCADs for the following airports (e.g. "AF2\_KXXX.bgl," "AF2\_KXXX\_DEFAULT\_XX.bgl" or "PAI\_AF2\_KXXX\_DEFAULT.bgl") NOTE: LEAVE ALL AFCADS BEGINNING WITH "MAIW" as they were installed with step 1:

KDYS

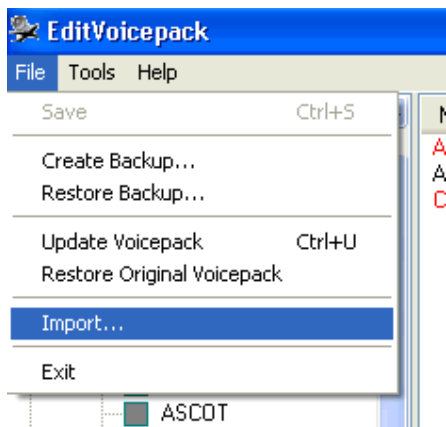

NOTE: Failure to remove these duplicate files may result in problems with AI aircraft parking and operation. It is recommended you move these to a temporary folder instead of deleting them, however, you should not need them again as the AFCADs included in this package are thoroughly researched and highly detailed. If you are using addon scenery for one of the above airfields, it is recommended you do NOT remove the AFCAD for the addon scenery, but instead remove the MAIW AFCAD file (e.g. MAIW\_KXXX\_DEFAULT\_XX.bgl) after installation.

### **Step 3) Install callsign voicepacks**

**3a)** If you don't have the EditVoicepack 3.1 freeware installed, download it and install it by [clicking here](#).

**3b)** Run EditVoicepack and import all .vcpmod files included in with this installation

3b1) Choose "Import" from the "File" menu

3b2) Find the folder “Flight Simulator 9/Military AI Works/USA/USAF/Dyess AFB/Voicepack Callsigns” in the “Look in:” window

4b3) Click “open” for each file

**4c)** Update the Voicepack for FS9 by choosing “Update Voicepack” from the “File” menu—ensure the “Custom/Callsigns” box is checked in the left hand window. (note: the update may take a few minutes—do not attempt to start FS9 until the update is complete. Look for “Ready” in the lower left corner)

#### Step 4) Activate MAIW Scenery

Not applicable, no additional scenery was included in this package

***That's it! You've successfully installed this package.***

## 5. Troubleshooting

### **Problems addressed:**

["I've installed the package, but there are no Military AI aircraft at the airports"](#)

["When I go to an airport, there are AI planes parked on top of one another"](#)

["I can't find the aircraft in the aircraft selection menu"](#)

["When the Military AI planes talk to ATC, they use only numbers, not callsigns"](#)

["I'm following the Military AI aircraft, and they won't come back for touch-and-gos"](#)

**Problem: "I've installed the package, but there are no Military AI aircraft at the airports"**

Potential issue: FS9 AI traffic density set too low

Fix action: In FS9, set the AI traffic density slider to at least 60%.

**Problem: "When I go to an airport, there are AI planes parked on top of one another"**

Potential issue: Multiple AFCADs active for the same airport

Fix action: Using Windows Explorer, open the folder "Flight Simulator 9/Addon scenery/scenery." Look for duplicate entries for the following airport identifier:

KDYS

Files may be named in several ways. The most common are "AF2\_KXXX.bgl," "AF2\_KXXX\_DEFAULT\_XX.bgl" and "PAI\_AF2\_DEFAULT.bgl." Keep the files named "AF2\_KXXX\_DEFAULT\_RM.bgl" and remove all others with duplicate airport identifiers.

**Problem: "I can't find the aircraft in the aircraft selection menu"**

Issue: These are AI aircraft and have been programmed to not show up in the flyable aircraft selection menu

Fix action: If you simply must select these aircraft, use an editing program such as AirEd and change the Aircraft type from "0" to "2"

**Problem: "When the Military AI planes talk to ATC, they use only numbers, not callsigns"**

Potential issue: Callsign Voicepacks were not installed correctly

Fix action: Run the EditVoicepack software. Look for the following callsigns in the "custom modifications/callsigns" section of the program:

BAT  
DARK  
HAWK  
HAZARD  
OBLONG

If any of these are missing, choose "File/import" and open the appropriate .vcpmo file in the folder "Flight Simulator 9/Military AI Works/USA/USAF/Dyess AFB/Voicepack Callsigns."

Once this is complete, or if all callsigns are present, ensure the "Custom/Callsigns" box is checked in the left hand window and choose "File/Update Voicepack" to install them into FS9 (this may take a few minutes, do not open FS9 until the lower left of the EditVoicepack screen says "Ready.")

**Problem: "I'm following the Military AI aircraft, and they won't come back for touch-and-gos"**

Potential issue: You're following your AI aircraft

Fix action: Stop following your AI aircraft. For some reason, a watched AI aircraft does not always behave the way it is programmed to. If you wait for the aircraft at the airport, it will arrive on schedule

## 6. Notes and Resources

This package was built by the [Military AI Works](#) online community. If you are interested in making Military AI traffic more realistic, visit this site!

### Flightplans:

The flightplans are fictional, but yield realistic appearing operations. I've tried to keep everyone happy by balancing the flights time hours with a large majority flying early morning and late afternoon.

Bomber aircraft typically fly in 2-ship or 4-ship formations. While much research and experimentation has been done to allow AI aircraft to fly in formation. I decided it would be impractical for the general user to include these techniques because of their potential instability and impact to non-military AI traffic. Instead, fighters in this package are assigned to a 2-ship or 4-ship which will depart and arrive at the same time. These aircraft will taxi together, but will still fly as single ships and take off and land in sequence, not in formation. For the Herks, I chose to simulate a couple of training deployments to Army Air Fields to pick up paratroopers and a couple single ship training missions including low level flights, hopefully everyone will be pleased.

All flightplans were created using the [yRoute](#) freeware AI traffic editor and tweaked using a text editor to remove spaces and unwanted characters. Flightplans were installed using Lee Swordy's [TrafficTools](#) freeware traffic compiler.

### Callsigns:

The callsigns used in this package are actual callsigns used by these units based on information found online [here](#). While squadrons generally use several different callsigns for training missions, I have included only one for each squadron for simplicity's sake.

All callsigns were created using the ingenious [EditVoicepack](#) freeware. This program is extremely simple and fun to use—if you need a new AI callsign, give it a try!

### AFCADs:

All AFCADs were created using Lee Swordy's [AFCAD v2.21](#). This has got to be one of the finest freeware programs ever created. Want to add some AI parking to your local airport? AFCAD makes it fun!

## 7. Permissions and Disclaimers

### Adverse Effects:

The contents of this package should not adversely affect your FS9 or computer operation if installed according to the instructions. The authors make no guarantee and bear no

responsibility for adverse operation or lost/overwritten files on your computer.

Use of Contents:

THESE FILES MAY ONLY BE UPLOADED TO AVSIM or FLIGHTSIM.COM BY THE AUTHOR.

THESE FILES MAY NOT BE UPLOADED TO ANY OTHER SITE WITHOUT THE AUTHOR'S WRITTEN PERMISSION. THESE MODELS,REPAINTS AND FLIGHTPLANS ARE FREWARE AND MAY NOT BE SOLD, OR PUT ON ANY SITE THAT CHARGES FOR DOWNLOADING FREE FILES. THE FILES FOUND IN THIS ARCHIVE MAY NOT BE DISTRIBUTED ON CD OR ANY MEDIUM FOR ANY KIND OF FEE, INCLUDING THE COST OF PRODUCTION, MATERIALS OR POSTAGE. THE MODELS, REPAINTS AND FLIGHTPLANS OWNERSHIP REMAIN WITH THE AUTHORS AS MENTIONED IN THE PACKAGE

Upload to FSPLANET.com will never be allowed by Military AI Works or World of AI.

Sources:

All information used to create this package was obtained via online, open-source research. All flight plans and schedules, while reasonable for military units, are fictional.
